SUPPLEMENTAL AMENDMENT B

TO THE COMMISSIONER FOR PATENTS,

SIR:

This amendment supplements the response (Amendment A) filed February 27, 2003 in response to the Office action mailed August 27, 2002.

IN THE CLAIMS:

Please add the following new claims 348-398:

348. (new) A process for preparing an N-(phosphonomethyl)glycine product by oxidizing an N-(phosphonomethyl)iminodiacetic acid substrate, the process comprising:

*B1*  
introducing an aqueous feed stream comprising the N-(phosphonomethyl)iminodiacetic acid substrate into a liquid reaction medium within an oxidation reaction zone provided by an ejector nozzle loop reactor, the oxidation reaction zone being substantially back-mixed in the liquid phase and containing a heterogenous particulate catalyst for the oxidation reaction suspended in the liquid reaction medium, the catalyst comprising a noble metal deposited on a particulate carbon support, the liquid reaction medium comprising the N-(phosphonomethyl)glycine product;
